PROFESSIONAL PROFILE

Product-focused UX/UI Designer with **3 years of experience** designing and shipping web and mobile products across healthcare, home services, consumer apps, and early-stage startups. Experienced in owning the full design lifecycle from problem framing and discovery through iteration, testing, and developer handoff. Brings strong UX judgment grounded in accessibility, usability, and real-world constraints, informed by a background in audience-centered creative work.

CORE COMPETENCIES

- End-to-End Product Design
- User Research & Discovery
- Information Architecture
- Product & UX Strategy
- Mobile-First & Responsive Design
- Content Strategy & UX Writing
- Interaction & Visual Design
- Accessibility & Inclusive UX
- Usability Testing & Iteration
- Wireframing & Prototyping
- Stakeholder Collaboration
- Developer Handoff

EXPERIENCE AND IMPACT

PIXELVERSE STUDIOS, FEBRUARY 2023 – PRESENT

UX/UI DESIGNER / PRODUCT DESIGNER

- Own end-to-end UX/UI design for real-world web and mobile products, driving launch-ready experiences from discovery through delivery.
- Translate ambiguous problem spaces into structured UX solutions through lightweight research, usability analysis, and iterative design decisions.
- Design mobile-first user flows, wireframes, and high-fidelity prototypes in Figma to reduce cognitive load and improve clarity across diverse user contexts.
- Iterate designs based on user feedback and observed behavior, refining navigation and interaction patterns to reduce friction in core flows.
- Balance user needs, business goals, and technical constraints, prioritizing long-term usability over short-term visual preferences.
- Collaborate closely with developers to deliver clear design specifications and interaction guidance, reducing implementation ambiguity during build.
- Apply emotionally aware UX principles in healthcare and wellness contexts to support user trust and confidence in high-stakes decisions.

SELECTED PROJECT

- **Domani:** Led end-to-end UX and product design for a calm, habit-focused planning app, taking it from concept through public beta. Defined core user problems around decision fatigue and planning consistency, and iterated onboarding, planning, and execution flows to reduce cognitive load and support repeat use.

FREELANCE AND CONTRACT WORK, AUGUST 2017 – JANUARY 2023

MUSIC PRODUCER AND AUDIO ENGINEER

- Led end-to-end creative production projects from concept through final delivery, managing timelines, scope, and quality under tight deadlines.
- Translated abstract creative direction into structured, audience-ready outputs by iterating based on feedback, constraints, and performance goals.
- Advised artists on branding, distribution, and monetization strategies, reinforcing a strong understanding of audience needs and positioning.
- Balanced creative vision with practical constraints, mirroring real-world product tradeoff decision-making.
- Developed a repeatable, process-driven approach to creative problem-solving that translates directly into structured UX workflows.
- Deepened audience-centric thinking and comfort operating in ambiguous, feedback-heavy environments.

EDUCATION

BACHELOR OF SCIENCE (B.S.) IN MUSIC PRODUCTION (HONORS)

Full Sail University

CERTIFICATE IN FRONT-END WEB DEVELOPMENT

Rutgers University Coding Bootcamp

KEY PROJECTS

- **Domani:** Led end-to-end UX and product design for a mobile productivity app taken from concept through public beta. Defined core user problems around decision fatigue and planning consistency, and iterated onboarding, planning, and execution flows based on closed and early public beta feedback to reduce cognitive load and support habit formation.
- **Unveil:** Contract UX consultant for a mobile game with MarketMotion. Evaluated onboarding and interaction patterns impacting comprehension and retention; delivered UX recommendations aligned with gameplay goals and technical constraints
- **MoodTunes:** Conceptual product UX exploring mood-, energy-, and activity-based music discovery. Framed the core problem and designed a lightweight interaction model with exploratory wireframes and selected high-fidelity screens.
- **Jones Pressure Washing:** Shaped a trust-focused digital experience for a new local service business. Led UX and information architecture to clarify services, reduce perceived risk, and guide high-intent users toward confident quote requests.
- **360 Degree Care:** Established a credible digital presence for a home healthcare provider through accessible layouts, emotionally supportive UX, and clear information architecture.

ADDITIONAL INFORMATION

Technical Proficiencies: Figma, Adobe Photoshop, Webflow, HTML, CSS, VS Code, Notion, Slack, Google Workspace, Git; familiarity with AI-assisted design workflows for ideation, and iterative exploration
